

CO-CREATION WORKSHOPS FOR DRONE/RPAS APPLICATIONS IN NAMIBIA

Together with our partner WeRobotics, we are supporting the Namibian Civil Aviation Authority (NCAA) in building on and evolving the existing regulatory framework (NAMCAR Part 101) and training syllabi for license qualification purposes as well as guidance material. Additionally, we are working with Deloitte to better understand the challenges Namibian drone and RPAS users are facing in order to map the UAS regulatory environment in Africa for improved operational capability.

OUR MAIN GOAL

The goal of our initiative is to jointly enable the routine operation of drone/RPAS in a safe, harmonized and seamless manner that considers all current and possible future applications and use of drones/RPAS in Namibia. This will allow the creation and growth of a thriving drone/RPAS ecosystem in Namibia.

WORKSHOP GOALS

Catalog with current and future drone/RPAS applications, organized in a logic that reflects needs in relation to regulations

Overview of identified and qualified challenges faced for drone usage in Namibia

Overview of training levels and training needs.

Location: Workshop location in Windhoek will be announced shortly.

FORMAT & DATE OF WORKSHOPS

- ✔ We will organize 2 initial workshops that will each last 1 day, on **Tuesday February 7 and Wednesday February 8, 2023**. Interested participants will attend the one day that fits them best.
- ✔ We will then bring together the outcomes of both workshops in a joint summary workshop on **Monday, February 13, 2022**. All participants who have either participated in the workshop on **February 7 or 8** are invited to attend.
- ✔ We will share the anonymized workshop outcomes to NCAA on **Tuesday, February 14, 2022**. Workshop participants who would like to attend the presentation are welcome to attend.

TARGET PARTICIPANTS

The ideal participants of the series of Co-Creation workshops are **current and future drone/RPAS users** active in Namibia in the following sectors:

- > Commercial companies
- > Civil society (local non profits, association, etc.)
- > Government services and ministries
- > Think tanks and research institutes
- > Academia

Cost: Workshops are free of charge for all participants
